

WEB TECHNOLOGIES LAB EXERCISE-1

- [1] Print your name in green.
- [2] Print the numbers 1 - 10, each number being a different colour.
- [3] Prints your name in a Tahoma font.
- [4] Print a paragraph with 4 - 5 sentences. Each sentence should be a different font.
- [5] Print a paragraph that is a description of a book, include the title of the book as well as its author. Names and titles should be underlined, adjectives should be italicized and bolded.
- [6] Print your name to the screen with every letter being a different heading size.
- [7] Prints 10 names with a line break between each name. The list should be alphabetized, and to do this place a subscripted number next to each name based on where it will go in the alphabetized list. (Example: Alan₁). Print first, the unalphabetized list with a subscript number next to each name, then the alphabetized list. Both lists should have an <h1> level heading.
- [8] Print two paragraphs that are both indented using the command.
- [9] Print two lists with any information you want. One list should be an ordered list, the other list should be an unordered list.
- [10] Prints an h1 level heading followed by a horizontal line whose width is 100%. Below the horizontal line print a paragraph relating to the text in the heading.
- [11] Print some preformatted text of your choosing. (Hint: use the <pre> tag)
- [12] Print a long quote and a short quote. Cite the author of each quote.
- [13] Print some deleted and inserted text of your choosing.
- [14] Print a definition list with 5 items.
- [15] Print two addresses in the same format used on the front of envelopes (senders address in top left corner, receivers address in the centre).
